

BOOK A DOCTOR APP - ROLES AND RESPONSIBILITIES

1. USER REGISTRATION

John, a patient in need of a routine check-up, downloads and opens the Book a Doctor App. He starts by registering as a customer, providing his email address and creating a password to ensure a secure login. Once the registration process is complete, John is welcomed to the app with the option to log in.

Email: john.doe@example.com

Create Account

2. BROWSING DOCTORS

After logging in, John is directed to a dashboard showcasing a list of doctors available for appointments. The app offers various filters for him to search for healthcare providers based on criteria such as specialty, location, and availability. John filters the list to find a family physician in his area, available for a routine check-up.

Filter: Specialty = Family Physician | Location = Near Me

Available Doctors Found:

• Dr. Smith (Family Physician) - 0.8 miles away - Available Today

3. BOOKING AN APPOINTMENT

John selects Dr. Smith, a family physician, and clicks the “Book Now” button. A booking form appears, prompting John to select his preferred appointment date and time. He is also asked to upload relevant documents, such as his medical records and insurance details. Once the form is completed, John submits the appointment request. He receives an immediate confirmation message indicating that his request is under review.
